

**Invitation to a Learning Experience:
Join our International Assessment in Community in 2023 in the Netherlands**

18 - 21 September 2023

Accommodation De Beukenhof, Biezenmortel, The Netherlands

"I was fortunate enough to attend the assessment in England. Though I have participated to several IIT's and other trainings, I can say from the bottom of my heart how my needs for intensity, exchange, knowledge, support, connection, exploration and many more have been met in only four days. I look back with a lot of gratitude to this assessment as a community member and I truly hope and plan to be present at many more to come."

Community Member

What?

If you are interested in becoming a Certified Trainer with CNVC, or want an enriching and unique NVC learning experience you are welcome to attend our coming assessment as a NVC-Community Member. You will deepen and develop your NVC skills and awareness while focusing on the candidates. We will all work in community to ensure the integrity of NVC. You will be invited, at certain times, to give feedback and through the event hold the space with NVC consciousness.

Questions we invite you to focus on:

What is the experience like for candidates? How do we DO assessment in NVC in partnership? What would support you to be fully present, fully yourself when you come for assessment? How can you work on your personal learning edges?

Led by? (In English)

CNVC Assessors: Towe Widstrand from Sweden, Gina Lawrie from United Kingdom, Shona Cameron from Scotland, Ania Mills from Poland, Dionne Verbeet and Thera Balvers both from The Netherlands: The English Speaking European Assessor Team (ESEAT)

More details: Our events get booked up very quickly so if you are interested and want information about logistics, enrolment, payment, visit our website: www.nvcassessment.eu where you will find the booking form and/or contact Amy Dyer: amy8dyer@gmail.com

"I've experienced the assessment as a learning that combines 50 days of NVC training in 2.5 days. If you are having doubts, don't, instead dive in and follow the flow."
