

The English Speaking Assessor Team (ESEAT) invites you to:

Stepping Stones 2024

Welcoming Jackals and Deepening Empathic Listening

28th 29th + 30th November
(Online)

Our purpose:

- ❖ In-depth learning and practice of NVC, for your integration of skills and knowledge
- ❖ To increase clarity about the requests for the portfolio and the final assessment
- ❖ To create awareness of and support for growth in your learning edges.
- ❖ To practise feedback in a partnership paradigm
- ❖ To meet and know each other as assessors and candidates.
- ❖ To support a sense of belonging to a 'journey of giraffes'*

with Ania Mills, Dionne Verbeet and Shona Cameron, CNVC Assessors with ESEAT

Cost: Sliding scale: € 250 - € 500: Each day we will spend 3.5 hours together on Zoom

Thursday & Friday afternoon 14.00 - 17.30 (CET)/ 13.00 - 16.30 (UK)
plus Saturday morning 10.00 - 13.30 (CET)/ 9.00 - 12.30 (UK)

To register: <https://forms.gle/WXYiWWG7zaM6wsno9>

Please be aware we still want to meet you in person at our other events. To support our intention for more than one assessor to know you, to build community and to support the development of skills we consider crucial in becoming a Certified Trainer. Together, we make a mutual decision for you to move forward towards assessment and this is best done in person. For questions around the Stepping Stones as a part of your certification journey, you can read more on our [website](#).

*The collective noun for a group of giraffes is a herd, colloquially called a journey of giraffes – which aptly describes the way they traverse their typical savannah, woodland and grassland habitat.

We ask all participants to be online for the whole event.

For questions, contact Shona : shona@nvcassessment.eu or Amy amy@nvcassessment.eu
for booking information

**A unique combination of mentoring and training towards
certification in Nonviolent Communication.**

Deepen your NVC trainer skills

**The collective noun for a group of giraffes is a herd, colloquially called a journey of giraffes – which aptly describes the way they traverse their typical savannah, woodland and grassland habitat.*
